Columbia Theme Usage Guidelines

Currently v1.0.1 · By Themes Collective · [Get Support](#)

1.01: Google Map

To set the location of the map, you should search the desired address on Google Maps, click 'Center Here' and the latitude and longitude parameters should appear in the search box. These figures should be set below, this is how our example looks; `center: new google.maps.LatLng(-34.397, 150.644),`

Example HTML markup:

```

1. <section class="map noMargin" id="map">
2.   <div id="map-canvas"></div>
3. </section>

```

Example JS markup:

```

1. <!-- Initialize Google Maps with api parameters -->
2. <script src="https://maps.googleapis.com/maps/api/js?v=3.exp"></script><!-- Our google api script -->
3. <script type="text/javascript">
4. (function() {
5.   "use strict";
6.   function initialize() {
7.
8.     var mapOptions = {
9.       center: new google.maps.LatLng(-34.397, 150.644),
10.      zoom: 8,
11.      scrollwheel: false,
12.      draggable: false,
13.      disableDefaultUI: true
14.    };
15.
16.    var map = new google.maps.Map(document.getElementById("map-canvas"), mapOptions);
17.
18.    var image = 'img/pointer.png';
19.    var marker = new google.maps.Marker({
20.      position: new google.maps.LatLng(-34.397, 150.644),
21.      clickable: false,
22.      title: "Our Location",
23.      icon: image
24.    });
25.
26.    marker.setMap(map);
27.
28.    var styles = [{
29.      stylers: [{
30.        saturation: -100
31.      }]
32.    }, {
33.      featureType: "road",
34.      elementType: "geometry",
35.      stylers: [{
36.        lightness: 100
37.      }], {
38.        visibility: "simplified"
39.      }]
40.    }, {
41.      featureType: "road",
42.      elementType: "labels",
43.      stylers: [{
44.        visibility: "off"
45.      }]
46.    }
47.  ];
48.  map.setOptions({
49.    styles: styles
50.  });
51. }
52. google.maps.event.addDomListener(window, 'load', initialize);
53. })();
54. </script>

```

1.01: Contact Form

To configure the correct settings so that emails are sent to your desired address, you will need to amend a few lines via the following:

- Go to the `includes` folder, then open the `contact-form` folder.
- Open the `contact_me.php` file in your favourite text-editor
- Go to `line 17` and add your own email address, in the space where it says `addyouremailaddress@here.com` . Remember to save the file and then close it.
- Open the other file in the same folder, called `contact_me.js` .
- Go to `line 48` and add your email address again, to where it says `me@example.com` , **in both places**. Remember to save the file and then close it.

Example HTML markup:

```

1. <!-- ===== Section Start ===== -->
2.
3. <section id="cform" class="container-fluid red-lt">
4.   <div class="row">
5.     <div class="col-lg-5 textpadding">
6.       <h3><span class="icon-location"></span> 21 Avenue House, NYC 20051</h3>
7.       <h3><span class="icon-phone"></span> 555-343-443</h3>
8.       <h3><span class="icon-bubble2"></span> email@address.com</h3>
9.     <br>
10.    <br>
11.    <p>Moveth every creepeth second divided itself living. Had over fourth good there deep all lights.</p><p>In Also can't moved brought spirit together moving. Gathered i so for and he good bearing also.</p>
12.   </div>
13.   <div class="col-lg-7 textpadding white">
14.
15.     <form name="sentMessage" class="well" id="contactForm" novalidate>
16.
17.       <div class="control-group wow fadeInUp" data-wow-delay="0.3s">
18.         <div class="controls">
19.           <input type="text" class="form-control" placeholder="Full Name" id="name" required data-validation-required-message="Enter Name" />
20.         </div>
21.       </div>
22.
23.       <div class="control-group wow fadeInUp" data-wow-delay="0.6s">
24.         <div class="controls">
25.           <input type="email" class="form-control" placeholder="Email" id="email" required data-validation-required-message="Enter Email" />
26.         </div>
27.       </div>
28.
29.       <div class="control-group wow fadeInUp" data-wow-delay="0.9s">
30.         <div class="controls">
31.           <textarea rows="10" cols="100" class="form-control" placeholder="Message" id="message" required data-validation-required-message="Please enter your message" minlength="5" data-validation-minlength-message="Min 5 characters" maxlength="5999" style="resize:none"></textarea>
32.         </div>
33.       </div>
34.
35.       <div id="success"> </div> <!-- For success/fail messages -->
36.       <button type="submit" class="btn btn-primary pull-right">Send</button>
37.     </form>
38.
39.   </div>
40. </div>
41. </section>
42.
43. <!-- ===== Section End ===== -->

```

Essential JS files:

```

1. <script src="includes/jqBootstrapValidation.js"></script><!-- Form Validation for contact form -->
2. <script src="includes/contact-form/contact_me.js"></script><!-- Contact form js -->

```
